ADESHINA AYODELE

Data Analyst | Business Intelligence | Commercial Insight | Applied AI

Paisley, Scotland | ayodeleintech@gmail.com | linkedin.com/in/adeshina-ayodele-02b12910

PROFESSIONAL PROFILE

Data analyst with an MSc in Artificial Intelligence (dissertation awarded Distinction), an MBA in Business Management and an engineering background. Practical experience using Python, SQL, Excel and Power BI to clean and analyse data, develop dashboards and support reporting and decision-making. Combines analytical project work with extensive experience in operational management, research, stakeholder communication and process improvement. Interested in applying data, market research and digital tools to identify business opportunities and improve commercial and service performance.

TECHNICAL & BUSINESS SKILLS

Core: Python • SQL • Power BI • Microsoft Excel • Data cleaning and quality • Data visualisation • Dashboard development • KPI reporting • Business analysis • Research and insight • ETL support • Stakeholder communication • Process improvement

Additional academic/project experience: R • Statistical analysis • Machine learning • NLP/LLMs • scikit-learn • TensorFlow • PyTorch • Microsoft Azure fundamentals

RELEVANT ANALYTICS EXPERIENCE

Data Analyst | Vista Data Solutions Ltd (formerly Datacy Resources Limited) | Jun 2025–Present

- Collected, cleaned and analysed datasets using Python and SQL to support reporting, identify patterns and improve the usefulness of business information.
- Developed Power BI dashboards to communicate operational performance, trends and KPIs to stakeholders.
- Applied machine-learning methods to customer segmentation and predictive analysis tasks.
- Supported ETL and data-quality activities, including validation, transformation and improvements to reporting workflows.

Independent AI & Machine Learning Project Work | Oct 2023–Present

- Developed NLP and chatbot prototypes using Python; investigated LLM-based document analysis and ways to make complex information easier to access.
- Applied feature engineering, forecasting and model evaluation in academic and independent projects, using scikit-learn and exploring TensorFlow and PyTorch as appropriate.
- CORES MSc dissertation: designed and evaluated an LLM and retrieval-augmented generation assistant to help users navigate Scottish Adult Disability Payment application information, with responses grounded in source documents.

UK HEALTH & SOCIAL CARE EXPERIENCE

Care Worker | Renfrewshire Council | Jun 2023–Present

Support Worker | RAMH | May 2023–Present

- Maintain accurate records, follow information-governance and safeguarding procedures, communicate with stakeholders and support reliable service delivery.

EARLIER OPERATIONS & ENGINEERING LEADERSHIP

Operations Crew Manager | NCS Tank Cleaning | Sep 2015–Dec 2022

- Coordinated technical teams, contractors, schedules, compliance, daily operational reporting and project-cost monitoring.

Head, Technical Operations | FFM Facilities Ltd | Apr 2013–Aug 2015

- Introduced SOPs, KPI and SLA monitoring, and management reporting; reported 98% achievement of facilities maintenance requirements and targets.

Head of Projects & Technical / Head of Operations | Eliezer Workplace Management | Sep 2011–Apr 2013

- Led project reporting, audits, process improvements and stakeholder coordination.

Earlier: Projects Manager, Magnate Concepts (2010–2011); Projects Manager, Mirra Ventures (2008–2010); Facilities Manager / QA Officer, Alpha Mead (2007–2008).

EDUCATION & DEVELOPMENT

MSc Artificial Intelligence (Distinction in dissertation) | University of Stirling | 2024

MBA, Business Management | University of Lagos | 2010

BSc, Metallurgical & Materials Engineering | University of Lagos

Further development: Python, SQL, Power BI, machine learning and Azure fundamentals; currently preparing for AZ-900 and PL-300 (not yet certified). Earlier technical training in automation and instrumentation.
